

APARTMENT BUILDING IN FRICK 2005-2007

NEW BUILD

BOF, 5 APARTMENTS
BAHNHOFSTRASSE 13
5070 FRICK

ARCHITECTURE ORDER

The building evolved along the lines of amorphous plot geometry. The result shows an interior space, which embraces the outer space with open arms. In order not to disturb this gesture and to get an overall picture, recessed balconies were incorporated into the building for the apartments instead of external balconies. These have each been developed in the opposite overall direction. Thus mutual privacy is granted among the respective homes. The attic floor was set in the geometry with alignment at right angles to the two lower floors.
