

LIGHTS
2012

ALFIO FRISINA
800x1200 mm
Photography,
under acrylic glass

Edition: 10

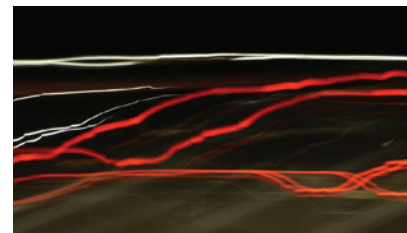

- Lights I
- Lights II
- Lights III
- Lights IV
- Lights V

Light is energy with enormous speed, about which science tells us that this speed cannot be reached. In these photographs, the aim is to capture this elusive movement and to make light sculptures out of it, as if one would encourage science to look further. The „Lights“ images show a world which we cannot perceive with the naked eye. This reality is only revealed through the medium of photography.
